

PROVEN PERFORMANCE

*TOPTINT COLOUR. SOUTH SHIELDS PROMENADE
THE OPTIMUM CONCRETE FOR COLOURED FINISHES*

TOPTINT

Product TOPTINT COLOUR
Client BARTON CIVIL ENGINEERING
Location SOUTH SHIELDS PROMENADE
Date of completion LATE 2010

A collection of concrete available in a wide palette of standard and bespoke colours for internal floors, external walkways and creative landscapes.

THE CHALLENGE

As a key component of the massive £2 million regeneration project along Sandhaven Beach, the Tarmac team were tasked to rejuvenate the prestigious South Shields Promenade. The client's vision was to create beautiful walkways combining different colours and aggregates. These would form part of a new artistic shoreline – including outdoor art spaces for street performers and buskers.

OUR SOLUTION

After carefully studying the client's requirements, the Tarmac experts recommended 1,200m³ of Toptint exposed aggregate concrete in three colours: yellow, pink and natural. By using precise mixes of sandstone with 10mm aggregate and offering technical support to all those working with the mixes Tarmac achieved striking, longlasting colour results.

RESULTS AND BENEFITS

By providing the training and demonstrations to the team that would be working with the materials, Tarmac was able to accurately achieve the perfect concrete mixes and deliver a result that delighted the client and the local community.
