

# **PROVEN PERFORMANCE**

*The one pass, footpath surfacing solution  
Abbey House, Seedhill Road, Paisley*

**ULTIFASTPATH**

**Product** ULTIFASTPATH

**Client** Renfrewshire Council

**Main Contractor** Renfrewshire Council

**Location** Abbey House, Seedhill Road, Paisley

**Completion** March 2014

## THE CHALLENGE

The site on a traffic sensitive road outside a Social Work Office which was heavily trafficked by pedestrians. Not only by staff going to their work but also users of the service. Renfrewshire Council wished to have minimal access restrictions to avoid disruption to traffic and hazards to pedestrians. A solution which was fast and cost-effective was required, which would allow work to be completed in one day with minimal disruption.

## OUR SOLUTION

Renfrewshire Council is the lead authority in a Collaboration of four Local Authorities. Tarmac has been working in partnership with Renfrewshire Council for over 8 years to supply aggregates and asphalt. Through our commitment to continuous improvement and leading in innovation to assist with delivering improvements in construction techniques, faster construction methods, health and safety benefits and improvements to sustainability targets we suggested the use of ULTIFASTPATH as an alternative to conventional footway construction in order to minimize disruption and time taken on site.

## RESULTS AND BENEFITS

ULTIFASTPATH is a single layer application for footpaths that eliminates the need for conventional binder and surface course construction, for faster completion times and minimal disruption.

For this contract Renfrewshire Council installed the material in a single layer of 60mm, therefore halving construction time. This reduced the programme by one day and saved £1500. It also increased productivity and reduced disruption to residents which helped to strengthen the perception of Renfrewshire Council.
