PERMANENT POTHOLE REPAIR MACADAM

Cempak Permanent Pothole Repair Macadam is a HAPAS and BBA approved permanent cold lay macadam material formulated for fast one stop permanent reinstatements.

USES

• Driveways
• Repairing and widening footpaths
• Pothole repairs

SPECIAL PROPERTIES

• Ready to use, straight from the bag
• Ready for traffic after 30 minutes following compaction
• Provides a professional finish
• Environmentally friendly
• Improved health and safety

APPLICATION

Cempak Edging and Jointing Spray should be applied to all vertical edges of the reinstatement including any ironwork before loosely placing Permanent Repair Macadam into the excavation.

Using a Vibrotamper or Vibrating Plate, compact the Permanent Pothole Repair Macadam in accordance with Appendix 8 Procedures, of the Specification for Reinstatement of Openings in Highways.

LAYING AND COMPACTION

After sealing all vertical edges with Edging and Jointing Spray, lay Permanent Pothole Repair Macadam into the reinstatement at layers of 45mm (compacted down to 30mm).

STRENGTH DEVELOPMENT

In general terms strength development is governed by how well the material has been compacted.

TOOL CLEANING

Tools may be cleaned with Hydrocarbon solvents such as white spirit.
PACKAGING AND STORAGE

Permanent Pothole Repair Macadam is available in 25kg plastic sacks.

Permanent Pothole Repair Macadam can be stored up to 12 weeks in bags.

Permanent Pothole Repair Macadam should be stored in frost-free conditions.

Whilst Permanent Pothole Repair Macadam is being transported and whilst on site it must be covered to prevent frost or low temperature penetration.

QUALITY CONTROL

All Tarmac Building Products are factory blended, tested and packaged to quality control procedures in accordance with BS EN ISO 9001.

HEALTH AND SAFETY

Health and safety advice, which must be followed, can be found on the Material Safety Data Sheet.

Skin contact with the product should be avoided. The product is very sticky and the use of rubber gloves is advised during application. Stains on the skin may be removed using proprietary cleaners.

Avoid breathing in vapours or fumes.

If the formation of vapours is a risk, then additional ventilation should be provided.

Handle away from sources of ignition and heat.
