Tarmac High Strength Concrete (40N) is a premixed strong and hardwearing concrete manufactured from cement, specially selected and graded sand, and 10 mm coarse aggregate. When used correctly it will typically achieve a 28-day compressive strength of 40 N/mm².

GENERAL INFORMATION
Tarmac High Strength Concrete (40N) is suitable for concrete bases, drives, paths, garage floors, structural concrete, footings and foundations*, and for fixing security fences, traffic signs and bollards. This product is manufactured to a third-party accredited BS EN 9001 Quality Management System.

* In soils containing high sulfate levels, concrete made with Tarmac Sulfacrete should be used. For further information contact the Technical Helpdesk on: 0845 812 6232.

PACKAGING & COVERAGE
Tarmac High Strength Concrete (40N) is available in weatherproof and tear-resistant plastic packaging. One bag will typically produce around 0.01 m³ of fresh concrete (0.33m x 0.33m x 0.1m).

MIXING
Mix with water until the required workability and consistency is obtained. This can normally be achieved by the addition of 2 litres of clean water per bag of concrete. Mixing by machine is preferable with a mixing time of 3-5 minutes. If mixing by hand, mix on a clean board and take care to avoid loss of water and cement during mixing.

WORKING TEMPERATURE
Do not use at temperatures below 5°C or above 30°C without taking precautions to ensure that new work is protected from freezing or drying out.

USE
Tarmac High Strength Concrete (40N) should be used within 30 minutes of adding water. Concrete should be fully compacted before finishing.

Newly finished concrete should be protected from drying out by covering with polythene sheeting or wet hessian (sacking) for a minimum of 7 days. Clean all tools and equipment immediately after use and before the material has set. The final strength and finish of this product will depend on the user having the required skills and familiarity with the product and its application methods.

STORAGE AND SHELF LIFE
Tarmac High Strength Concrete (40N) is a cement-based material and should be handled and stored with care. Unopened bags can be stored in either outdoor or indoor conditions. Open bags should be stored in dry cool conditions protected from wind. Information on the maximum storage period (shelf life) of the product is shown on the bag.

Normal manual handling procedures (Manual Handling Operations Regulations 1992) should be followed when unloading or moving bags.
