

PROVEN PERFORMANCE

*Fuel resisting asphalt
Michaelwood services, M5*

ULTISHIELD

Product ULTISHIELD

Client Buckingham Group

Main Contractor Gibbs Surfacing

Location Michaelwood services, M5

Completion February 2011

THE CHALLENGE

The busy service station had substantial damage across parking areas largely the result of fuel and other corrosive spillages. The client wanted a cheaper alternative to grouted macadam and ULTISHIELD was specified as an effective solution. It offered enhanced fuel resistance and long term durability.

OUR SOLUTION

We worked with Gibbs Surfacing throughout the contract offering a hands-on support to the teams involved. The contract required the use of locally sourced materials so technical support ensured quality and consistency. Upon completion the client was also provided with a five year guarantee.

RESULTS AND BENEFITS

ULTISHIELD provided a hardwearing surface. Its fuel resisting attributes helped withstand the effects of heavy traffic in this busy parking area.

Both car and lorry parks (South and North) performed well in standing up to the harmful effects of fuels, oils and de-icing agents.
