

PROVEN PERFORMANCE

TIDDINGTON ROAD, STRATFORD UPON AVON

TOPFLOW
HORIZONTAL, SCREED A, EXCELIO

Product TopFlow Horizontal, Screed A, Excelio
Main contractor Rajkowski
Architect Rajkowski
Sub-contractor E J Bennett
Location Tiddington Road, Stratford Upon Avon
Date of completion January 2016

Rajkowski are a design and build company that pride themselves on creativity and quality. They approached Tarmac with several flooring specifications. A site visit by our local technical sales representative gave Tarmac the opportunity to discuss all the solutions

THE CHALLENGE

There were 3 main flooring areas to look at.

The extended area of the project required 150m² of 75mm screed over underfloor heating.

Areas of the existing property required a screed overlay of 15-25mm.

The new build garage required a 150mm concrete slab.

The Topflow range provided solutions for all aspects of this project.

OUR SOLUTION

Working with one of Tarmac's local partners, E J Bennett, the chose solutions that included Topflow Screed A, Topflow Horizontal and Topflow Screed Excelio from Tarmac's range.

Topflow Screed A is a liquid screed that can be laid thinner than traditional screeds and provides greater efficiencies when used with under floor heating. This allowed the floor screed specification over under floor heating to be reduced and insulation increased, allowing for improved energy efficiencies on the property.

Topflow Horizontal is a self compacting flowing concrete that can be poured quicker than conventional concrete, with reduced labour.

Excelio is a revolutionary liquid screed that can be laid to a minimum depth of 12mm bonded.

RESULTS AND BENEFITS

9m³ of Topflow Screed A low laitence was supplied to complete the 55-60mm screed over under floor heating specification. The screed was poured in just a couple of hours compared to the two days allowed for a tradition 75mm screed.

The garage base was poured and finished in less than 1 hour using 6m³ Topflow Horizontal.

The thin section overlay was completed using 2m³ Tarmac's Topflow Screed Excelio.. 1m³ of Tarmac's Excelio can cover up to 80m² of floor area when used at 12mm. Again, the product is a flowing solution which contributes to the fast installation process and high quality finish achieved.
