

# *TOP*PROC CW

The concrete solution that keeps you  
working all winter

# TOPROC CW

High performance in the lowest temperatures, up to -7°C

*Your site productivity doesn't have to drop just because the temperature is plummeting. As the only cold weather readymix concrete in the UK, TOPROC CW is specially formulated to tolerate colder conditions. Keeping you working all winter.*

To find out how TOPROC CW can help you keep your site working all winter long email [toproccw@tarmac.com](mailto:toproccw@tarmac.com)

## NO STOPPING YOU

TOPROC CW allows construction work to continue during periods of cold weather.

## PERFORMS UP TO -7°C

Enables placement of superior performance concrete in temperatures as low as -7°C.

## REDUCED PROTECTION TIME

Accelerated setting reduces protection time required.

## MORE DURABLE

TOPROC CW delivers a compressive strength of up to C32/40N concrete.

## SAVES TIME AND MONEY

Prevents potential costly construction delays and time penalties.

## BESPOKE FORMULATIONS AVAILABLE

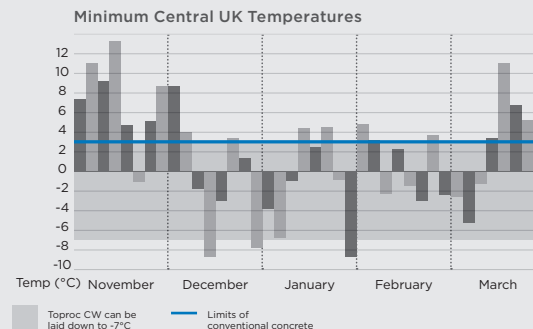

TOPROC CW can incorporate macro fibres to replace 'A' grade crack control mesh in horizontal applications, allowing the contractor to further speed up the construction process.

## CALCIUM-FREE

Gains early strength without the addition of calcium chloride.

## NATIONWIDE AVAILABILITY

Through our nationwide network of concrete plants, we can supply TOPROC CW to most sites throughout the UK.

Please note although Toproc CW can be laid in colder temperatures than conventional concretes, it cannot be laid in snow.
